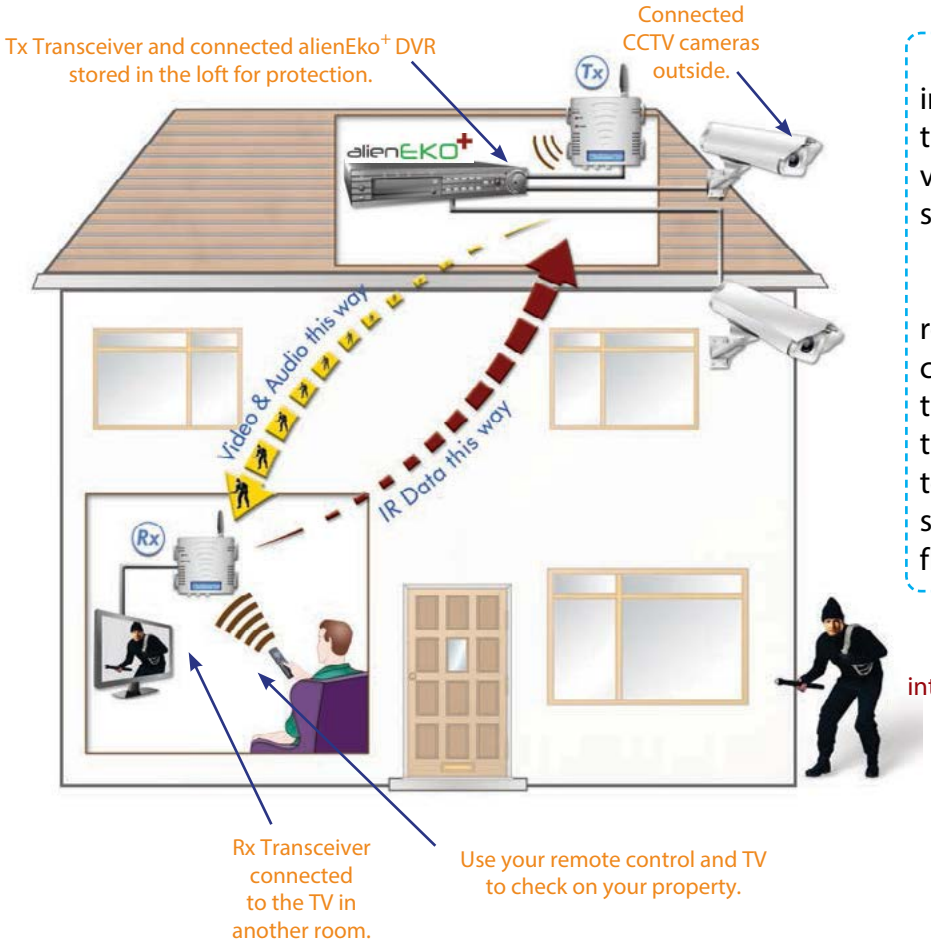
How to FIT CCTV

Tip No: 243

Question: How can I see CCTV images from a DVR and control it from a remote location?

Answer: The VideoMitter can wirelessly send images to a TV and can return IR remote signals to the DVR

See Images From a DVR and Control it from a Remote Location Without Wires!



In this solution, the DVR is hidden in a cupboard or loft space. The transmitter is used to send the video output from the DVR to a suitable location for the user.

The user can then use the DVR's remote control to change camera channels, replay footage etc using the VideoMitter's ability to send the IR remote control signals back to the DVR. This is a very popular solution which enables far greater flexibility in siting the DVR.

Possible intruder on the premises.

VideoMitter Video-Audio TX/RX Pair
Product code: MITKIT-LITE
