

Question: What is the easiest and fastest way to bare power cores into a DC power connection?

Answer: Zulugs are easy fit DC connectors without the need for soldering. Ideal for CCTV systems and saving time.

Short on time? Forgotten your soldering iron? **ZULUG** to the **RESCUE!**

Zulugs are a range of easy-fit DC connectors, ideal for CCTV cameras. Each Zulug has a built in terminal strip for connection to power cables. They are the **fastest way** to make bare power cores into a DC power connection.

Follow these **5** easy steps and forget the hassle of using that soldering iron:

- 1) Take your cable power cores and strip back each to the copper conductor by about 5mm.
- 2) Identify your cores as positive and negative. On antihum cable, this is:

Black is negative (-)
Red is positive (+)
- 3) Loosen off the terminal marked + and – on the Zulug.
- 4) Insert the correct core into each terminal.
- 5) Tighten the terminal strip screws.

Product Code:
CON370

Convert the DC socket on your camera into a terminal connection using the CON370.

Product Code:
CON371

Convert the DC plug on your PSU into a terminal connection using the CON371.
