Video Outputs	1
Video Out Connection	HDMI
Power	12V DC
Current Consumption	450mA
PSU	Supplied
Controls	Push Button & IR Remote
Remote Control	Included
Screen Display	7 Display Modes
Dimensions	190 x 90 x 23mm

HDM401

The HDM401 can take 4 HD video and audio signals and display on a single HD monitor. There are 7 different modes that can be selected which includes quad formats, two channel, single channel fixed or sequencing modes.

Buttons on the HDM401 can be used for video and audio selection but can also be controlled using an IR remote which is supplied, along with a 12 V DC 5A PSU.

Installation Instructions

Connect 4 HD feeds to the HDM401 using HDMI cables of 15 metres maximum. Connect a HDMI cable from the unit to a HDMI monitor, again no longer than 15 metres. Connect the 12 V DC 2A power supply to the 2.1mm power socket and connect the mains to the power supply.

You can now use the buttons on the front of the HDM401 to select video and audio. Note that you may prefer using the IR remote supplied with this unit to do this as you will not have to go through all the options to select the one you require. **Please note that you can only select 720p or 1080p output using the remote control.**

The HDM401 supports the following output resolutions:

Input Resolutions: 1080p, 1080i, 1360 x 768, 1280 x 1024, 1024 x 768, 720p

Output Resolutions: 1080p, 720p

The monitor picture displays may need adjusting using settings in the monitor menu if the format causes irregular shapes e.g. oval shapes, circles etc.
