

# 2-In-1 Saves Money!

AntiHum branded RG59+2 cable uses 24 x 0.15 copper conductors for each of the power cores, TWICE the size of some of our competitor's cores! This means using AntiHum cable, you can use it for TWICE the distance compared to our competitors before you get the same volt drop.

Similarly we use a SOLID COPPER core for the co-ax which means again over the same cable length our video signal is up to 4X as strong as our competitors that use "copper coated" centre conductors.

# What Makes Our RG59+2 Cable Such Good Value?

## Did You Know?

Our anti-hum co-ax cables have a solid copper core for maximum conductivity, they're not inferior copper coated cores (CCS or CCA) like other brands.

For more information on the benefits of solid copper cores over copper coated see online tip 302 ▶▶▶

#### The Expert's Advice...

"Don't risk buying cheap cable in an attempt to save money as it may actually be half the quality. For quality and value stick to AntiHum branded cable."
