

antihum.com

It's The Same As Our Normal Composite But Smaller!

Our Mini Composite Cable is great for installations where the standard size is hard to run in or conceal. Perfect for installs where space is too tight for standard composite cable as it's **HALF** the size of our RG59+2!

What Makes Our Mini RG59+2 Cable Such Good Value?

Did You Know?

Our anti-hum co-ax cables have a solid copper core for maximum conductivity, they're not inferior copper coated cores (CCS or CCA) like other brands.

For more information on the benefits of solid copper cores over copper coated see online tip 302 ▶▶▶

Features

Other Products To Consider

The Expert's Advice...

"Don't risk buying cheap cable in an attempt to save money as it may actually be half the quality. For quality and value stick to AntiHum branded cable."
