VID165	BNC-BNC LEAD 5M	1
SIG301	WARNING SIGN A4 PLASTIC	3
SIG101	DCR WARNING STICKER	5

Points to note:

- When connecting the CCT792 you need to connect power to red and black cables and video to yellow and black cables. Black therefore serves as ground for camera and power. The centre core of the co-axial cable is connected to yellow.
- When connecting cameras to power supplies ensure that sufficient headroom is available i.e add 50% to current rating minimum. For example if cameras rated at 800mA then power supply should be 1200mA minimum. If adding two further cameras to your DVR system check whether additional power supplies are required.
- In order to connect the audio unit to the Alien DVR you will need an RCA connector (phono) plug to record and an RCA connector (phono) plug and cable, to take audio to your audio monitor/PC sound card/audio amplifier.
- A copy of the Alien DVR Hardware manual is supplied as a paper copy. The software manual is loaded to disk into the same P.C folder when the software disk is installed. The software manual provides details of connecting a compatible mobile phone. Phones that are compatible are listed on the Alien DVR website.
