

RJ45 Crossover Leads, Yellow

Connects a PC Directly to your network DVR

A network cross-over cable in yellow. Typically used in the CCTV world to connect a single PC directly to a compatible network DVR rather than over the full network.

Example

NOTE: The DVR and PCs Subnet Mask must be identical, but the IP Address' must be unique to each device.

For step by step instructions on linking an AlienDVR to a PC see online tip 185 ▶▶▶

The Expert's Advice...

"Don't confuse a crossover lead with a patch lead, which is wired differently and typically used for connecting a DVR to a network."
