

HDM130

Send HDMI Signal Over Co-ax - up to 100m !!

... lifesaver for monitors in a more remote location

- 1080p HD Quality
- Up to 100m Co-ax Run
- Reverse IR Control Function
- Sold in TX/RX Pairs
- Low Voltage 12V DC
- Compact & Easy to Hide Behind Other CCTV Equipment

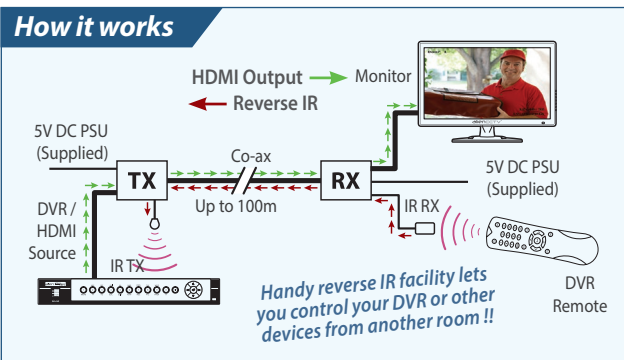

This pair of HDMI extenders are a superb problem solver particularly on legacy CCTV installations where you need to run an HDMI signal but only have an RG59 Co-ax in place.

Ideal when you need to get a DVR output to a monitor but have no cable route for an additional HDMI lead or it is just too far for an HDMI signal to perform.

RG59 has been the standard CCTV cable for many years so this pair can easily make use of an existing run and with HDMI leads having limited performance over longer distances this is a great way to achieve up to a 100M run!

Supporting up to 1080p real-time, the pair even have a reverse IR control facility to allow control over your DVR or other devices from another room or part of the building. Each unit measures just 80x45x22mm so they can easily be fixed behind other equipment for ease of installation.

What's in the box:
TX, RX, 2 Reverse IR Extender Leads, 2 x 12VDC PSU

SPECIFICATION	
Input:	HDMI
Max Cable Input:	10m Max
Output:	BNC
Max Cable Output:	100m
Power:	12V DC (Supplied)
Current Consumption:	Tx - 680mA / Rx - 420mA
H22 x W45 x D80mm	

Code	Description
HDM130	HDMI Extender Over Co-Ax (Pair)

Add-ons

	RG59 Cable (Black 100m)		RG59 Cable (White 100m)
	CAB500		CAB090

HDM150

Extend any HDMI lead a Further 15m (15m in / 15m out for a max 30m run)

Passive - No power required!

- 1080p HDMI Extender
- Max 30m HDMI
- Max 15m In/Out

SPECIFICATION	
Input Video:	1.2V p-p
PSU:	No PSU Required
Power:	Via HDMI
Connections:	Female
Frequency:	165MHz Max
