

Introduction to HDMI Distribution

HDMI stands for "high definition multimedia interface" and was born in 2002 so it's quite an established technology. HDMI signals are sent along multi core HDMI cables from various pieces of equipment to monitors and TVs. HDMI signals can't be split and distributed without the aid of electronic HDMI distributors. Our range of ScatterBox HDMI distributors take one HDMI input then replicates it so the same HDMI signals can then be sent to more than one device, perfect for watching CCTV on multiple monitors. Our ScatterBox range has been designed and tested to send both the Video and Audio content to all the duplicated outputs unlike some budget models that don't do audio. The wall mounted design of most models adds that professional touch.

Wall Mount HDMI Splitter - 1 in - 8 out

- 12m Input - 8 x 12m Outputs
- Lossless Distribution
- View 1 HDMI on 8 Displays
- UHD 4K Compatible
- 5V DC (PSU supplied)

SPECIFICATION	
HDMI Input:	12m Max
HDMI Output:	12m Max
Max Resolution:	4K
Power:	5V DC (PSU Supplied)
Current:	500mA
Dimensions:	H136 x W297 x D27mm

Top Tip Use the HDM150 extender for 30m runs!

This 8 way HDMI splitter can take a HDMI feed from up to 12 metres away to replicate it to 8 more HDMI screens another 12 metres away.

Great for HD 1080p, 3D and 4K (30Hz) signal distribution. Wall mount for easy fitting out of the way from other equipment.

Handy HDMI Quad, Displays 4 HDMI Signals on 1 Screen

... switching and flexible display modes for the pro user

- ✓ 4 HDMI Inputs - 1 HDMI Out
- ✓ 6 Display Modes
- ✓ Free Remote Control
- ✓ 12V DC With PSU Included
- ✓ Quad or Full Screen Display
- ✓ Built-in Auto-Switcher
- ✓ Compact Size
- ✓ Free Wall Brackets Supplied

Free remote

HDM401

How it works: The HDMI Quad is simple to use, just plug your monitor in to the HDMI output and choose up to four sources to connect to the inputs and that's it! You could display 4 NVRs on one monitor or a mix of DVRs and SKY TV etc - it's very, very flexible.

Perfect for bigger businesses who want to monitor videos from different AV sources on one screen or need to switch quickly between sources, with no need to use multiple screens. The Quad comes with a remote control, which makes it even easier to switch between different video feeds as and when you need to.

Ideal for commercial use but also perfect for use in a home to switch smoothly between your CCTV feed, Sky Box, or maybe even your games console.

SPECIFICATION	
Output:	1 HDMI (15m Length)
Input:	4 HDMI (15m Length)
Resolution:	1080p / 720p
Power:	12V DC / 450mA
PSU:	Supplied
Dimensions:	H23 x W190 x D90mm

6 Display Modes
